[GitHub](#) | [LeetCode](#)

PROFILE SUMMARY

Final-year Computer Engineering student with expertise in Java, Full-Stack Development, and problem-solving. Strong experience with React, Node.js, Express, MongoDB, and practical project development. Passionate about building responsive, user-friendly, and secure web applications.

EDUCATION

Bachelor of Computer Science, Sharad Institute of Technology(CGPA -7.8) Expected 2026

Secondary Education, Shri Datta Kanishth Mahavidyalay(Percentage: 57%) 2021-22

SKILLS

Technical Skills : Java, basic Python,DataStructures, React,NodeJs,MongoDB, Bootstrap, tailwind

Databases : MongoDB

Developer Tools : Git, GitHub, Postman,vs code

Soft Skill : Problem Solving, HardWorking , eager to learn, Adaptability

EXPERIENCE

SQL Intern | Tecspeak IT Solutions | Sangli, India *June 2024 – July 2024* ([Check Out](#))

- Applied MySQL expertise to manage and structure data for web projects, building a solid foundation in database concepts essential for backend development.
- Contributed to performance optimization by refining database queries, showcasing analytical and problemsolving skills relevant to troubleshooting data-related issues

Trainee Web Developer | Tecspeak IT Solutions | Sangli, India *Aug 2023 – Sep 2023* ([Check Out](#))

- Developed website projects, gaining practical experience in front-end fundamentals (HTML, CSS) necessary for designing intuitive user interfaces in low-code platforms like Webflow and Framer.

PROJECTS

Resume Builder Web Application:

- Developed an **interactive resume generator** allowing users to dynamically input personal details, education, and experience to instantly preview and download resumes in a clean, professional layout.
- Designed a **responsive, print-friendly UI** adaptable for multiple templates and screen sizes.
- Focused on **user experience**, ensuring fast rendering and compatibility across browsers.

PassOP – Password [\(Check Out\)](#)

- Designed a **responsive and intuitive dashboard** using React.js with reusable components and local state management.
- Implemented **CRUD operations** for adding, editing, and deleting stored passwords securely in browser localStorage (or backend DB, if applicable).
- Integrated a **password strength meter** and **copy-to-clipboard** features for convenience and usability.

SmartBlog Hub – AI-Assisted Blogging Platform [\(Live Demo\)](#)

React, Node.js, Express, MongoDB, OpenAI API, Vercel

- Developed a full-stack AI-powered blog platform allowing users to generate, edit, and publish blog posts using AI assistance.
- Implemented user authentication, admin moderation, and comment features for dynamic content management.
- Deployed using **Vercel** for frontend and **Node.js backend** for real-time content handling.
- Enhanced productivity for content creators through AI integration and a clean, responsive UI.

ACHIVMENTS

Solved **300+ coding problems** on [LeetCode](#), enhancing algorithmic and coding skills.

Contributed to projects demonstrating strong understanding of full-stack development with MERN technologies.
